### WORK EXPERIENCE

- **BIZMARVEL - UI/UX and Backend**

**UI/UX:** May 2019 - Oct 2019, Switzerland  
**Backend:** Oct 2019 - Present, Switzerland

My role at Bizmarvel was to research thoroughly on app and web design, prototyping and developing app and web screens on on assigned project. Developing backend systems and building and managing databases, deploying Django apps and rest APIs.

Projects that I have worked on:

UI/UX - BizLinx, Neverthink, Bditto, Touch

Backend - Women's of the World, Touch

**Recommendation letter:** <https://bit.ly/2qWLaC4>

- **KIIT ACM Student Chapter**

Vice Chair at KIIT ACM student chapter.

ACM Membership ID: 5564321

**About ACM Student Chapter:** <https://www.acm.org/chapters/students>

### PROJECTS

- **CPIDE**

A lightweight, cross-platform code editor for competitive programmers. It's built on electron and ace, with an easy workflow for faster and easier testing of solutions.

**BitBucket:** <https://bitbucket.org/aritra1999/cpide/src/master/>

**URL:** <https://cp-ide.herokuapp.com/>

- **eComm.**

eComm is an ecommerce platform for small scale sellers who produce handmade items.

**GitHub:** <https://github.com/aritra1999/eCommerce>

**Demo:** <https://ecommdemo.herokuapp.com/>

- **Ano.**

Ano is a platform to send message anonymously to your desired person. This was a small side project for fun, with a userbase of 100 users within an hour of launch.

**GitHub:** <https://github.com/aritra1999/eCommerce>

**URL:** <https://anomessage.herokuapp.com/>

- **Notes**

Notes is password protected secure app to store anything what the user wants and can be accessed from anywhere.

### EDUCATION

#### KIIT - B.Tech (IT) 4th Sem

May 2019 - Oct 2019, Bhubaneswar

Working on research papers on computer vision, initiated and contributed to several experimental projects with my professors, friends and personal projects at KIIT.

**CGPA:** 8.6 / 10

**URL:** <https://kiit.ac.in>

### ARTICLES

#### Cross-platform Desktop Apps, using Electron.

Electron(formerly known as Atom Shell) is an open-source software framework developed and maintained by GitHub. It allows for the development of desktop GUI applications using web technologies: it combines the Chromium rendering engine and the Node.js runtime. The whole process is mentioned on my Medium article.

### SKILLS

#### Programming Languages

Python, C++, C, Java

#### Programming Technologies (Backend)

Django, PHP, Node JS, Electron JS

#### Programming Technologies (Frontend)

JavaScript, HTML, CSS

#### DBMS

SQL, MySQL, SQLite, PostgreSQL

#### Version Control

Git, GitHub, GitLab, BitBucket

#### UI/UX Designing

Adobe XD, Adobe Photoshop, Wireframing, Product UI/UX research and planning,
